Comment on tc-2021-242

Timofey Mukha

Community comment on "Ice-shelf ocean boundary layer dynamics from large-eddy simulations" by Carolyn Branecky Begeman et al., The Cryosphere Discuss.,
<https://doi.org/10.5194/tc-2021-242-CC1>, 2021

I believe sections 1 and 2 would benefit greatly from a figure showing a sketch of the simulated flow, and some relevant physical quantities and conditions, e.g. the angles alpha and beta, etc.

Also, if I'm not mistaking, the numerical methods used by the LES solver are not discussed. They should at least be mentioned briefly.
